Data collection

Looking for AIS on Seeley Lake

On the ground AIS monitoring

Slough in Missoula County

Boat wash

Curly leaf pondweed (CLP)

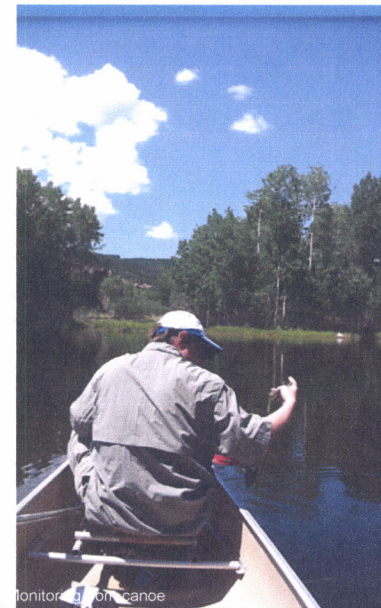

Yellow flag iris found during AIS monitoring

Fly-fishing guide business

Continued aquatics funding could provide for:

- Further prevention of AIS through education and outreach,
- Early detection of AIS through annual monitoring of priority water bodies,
- Control/ eradication of AIS through science based methods
- All of the above provide for opportunities to expand private business within Montana
